

ANSI Z359 CERTIFIED ANCHORAGE CONNECTOR (POINT)

ANSI Z359.0-2012

Definitions and Nomenclature Used for Fall Protection and Fall Arrest

2.22 Certified. An act or process resulting in documentation that determines and attests to criteria that meet the requirement of an American National Standard.

2.23 Certified Anchorage. An anchorage for fall arrest, positioning, restraint, or rescue systems that a qualified person certifies to be capable of supporting the potential fall forces that could be encountered during a fall or that meet the criteria for a certified anchorage prescribed in these standards.

2.6 Anchorage Connector. A component or subsystem that functions as an interface between the anchorage and a fall protection, work positioning, rope access or rescue system for the purpose of coupling the system to the anchorage.

ANSI Z359.2-2007

Minimum Requirements for a Comprehensive Managed Fall Protection Program

5.4.2.2 Anchorages selected for fall arrest systems shall have a strength capable of sustaining static loads applied in the directions permitted by the system of at least:

- A) 5,000 pounds (22.2kN) for non-certified anchorages, or
- B) Two times the maximum arresting force for certified anchorages.
